Properly maintaining the water chemistry of your swimming pool is possibly the most important aspect of pool care. Having the proper water chemistry makes your swimming pool water safer and cleaner and can even save you money. Chlorine is obviously one of the key chemicals to maintaining your pool water and 3 inch chlorine tablets have quickly become the first choice for pool owners. Because they are thicker than other pool chlorine tablets, 3 inch tablets dissolve slowly and protect your pool water for longer. Moreover, 3 inch chlorine tablets are the ideal size for your floaters, skimmers, or automatic feeders

At Shop Landmark Pools, you'll find top of the line swimming pool chlorine tablets that are effective and easy to use. 3 inch pool chlorine tablets can be put into the skimmer for inground pools and will help to maintain the chemical and chlorine level of your pool. Essentially, water chlorine tablets are dissolved into your swimming pool to kill bacteria and other organic contaminants. Choosing the right swimming pool chlorine tablets is therefore a very important decision. To keep your pool water safe for swimmers and also maintaining the clarity of water is best achieved with 3 inch chlorine tablets. Simply add the tablets to your pool water with an automatic feeder and you'll be sure to have the best pool water possible. Chlorine tablets for pools are efficient and highly effective so you can rest easy knowing that your family will be safe from bacteria and other organic contaminants.

Chlorine is the most popular chemical for sanitizing swimming pools. Chlorine is easy to use and economical. Shop Landmark Pools sells premium stabilized chlorine.
